Appendix D: Online Email Campaign Best Practices

Email messaging is an essential component for a successful overall event. An email campaign can foster great fundraising and team building plus community collaboration. This email campaign includes:

- Recruitment messages: Recruitment messages are emails sent to past participants or community supporters encouraging them to register for the current event.
- Engagement messages: Engagement emails are messages directed to registered participants for various purposes like encouraging their efforts, providing tips, and keeping them updated on event happenings.

Email “Rules”

**Why event emails must be sent from the Online Email Tool**

All emails that are sent to support a local event must be sent from the Event Management Center for the following reasons:

- Emails sent from the website are 100% compliant with American Cancer Society privacy policy, US CAN SPAM Laws, spam filters, participant “do not mail” preferences.
- Once an email is sent from the Event Management Center, the Online Chair can track how many people open, read, click, register and donate through your emails.
- It’s easy to stay in touch with everyone as the email tool automatically adds new participants to your website email groups.
- Links to your home page are added to those emails sent from the Online Email Tool; donors and participants don’t have to search for your event homepage or remember a web address.
- Messages deliver current and consistent cancer information and mission delivery.

ACS Privacy Policy

The American Cancer Society respects constituents’ privacy and allows individuals to restrict internal and external sharing of personal information. The Society recognizes that a constituent may wish to limit the ways in which the American Cancer Society contact them and, therefore, offer the following options:

1. Do not contact me by telephone.
2. Do not contact me by postal mail.
3. Do not contact me by email.
4. Do not share my contact information with other non-profit organizations.
5. Do not contact me with fundraising requests supporting the American Cancer Society.
6. Limit your fundraising appeals to semiannual solicitations only.
7. Do not contact me or share my information with anyone.

For more information on how to inform the American Cancer Society of any desired restrictions, please click on the following opt out link: [http://www.cancer.org/docroot/SU/content/SU_1_4_Opt_Out_Form.asp](http://www.cancer.org/docroot/SU/content/SU_1_4_Opt_Out_Form.asp)

If a constituent contacts the American Cancer Society with an opt-out request, all reasonable efforts will be taken to ensure that the individual will not receive any of the selected communications in the future. Updating communication preferences can be done at any time.

If a constituent opts back into a specific service, s/he will receive communication in that manner, regardless of the overall opt out selections. These services may include newsletter subscriptions or email communication by asking a question using “Contact Us.”

*If you have any questions, please open a [Salesforce Case](http://www.cancer.org/docroot/SU/content/SU_1_4_Opt_Out_Form.asp).*
The CAN-SPAM Act: Requirements for Emailers

The CAN-SPAM Act of 2003 (Controlling the Assault of Non-Solicited Pornography and Marketing Act) establishes requirements for those who send commercial email, spells out penalties for spammers and companies whose products are advertised in spam if they violate the law, and gives consumers the right to ask emailers to stop spamming them.

The law, which became effective January 1, 2004, covers email whose primary purpose is advertising or promoting a commercial product or service, including content on a website. A "transactional or relationship message" – email that facilitates an agreed-upon transaction or updates a customer in an existing business relationship – may not contain false or misleading routing information, but otherwise is exempt from most provisions of the CAN-SPAM Act.

The Federal Trade Commission (FTC), the nation's consumer protection agency, is authorized to enforce the CAN-SPAM Act. CAN-SPAM also gives the Department of Justice (DOJ) the authority to enforce its criminal sanctions. Other federal and state agencies can enforce the law against organizations under their jurisdiction, and companies that provide Internet access may sue violators, as well.

What the Law Requires

The CAN-SPAM law requires that event emails give recipients an opt-out method. The Online Manager must provide a return email address or another Internet-based response mechanism that allows a recipient to ask not to be sent future email messages to that email address; those requests must be honored. A "menu" of choices may be created to allow a recipient to opt out of certain types of messages, but the option to end any commercial messages from the sender must be included.

Any opt-out mechanism offered must be able to process opt-out requests for at least 30 days after the sent commercial email. The law gives Online Managers 10 business days to stop sending email to the requestor's email address. Another entity cannot send emails to that address. Finally, it's illegal to sell or transfer the email addresses of people who choose not to receive the organization’s email, even in the form of a mailing list, unless transferring the addresses so another entity can comply with the law.

Best Practices

The following information will discuss best practices when composing additional local email messages.

Send emails to the committee, team captains and members throughout the year.

- Include a link to the homepage so participants can visit the site and check out new information, including documents and photos.
- include reminders for important dates and activities at the bottom of each coaching message (rather than send a message with just date/activity info).
- Use the email campaign to award and recognize great fundraising or other accomplishments.
- When the event is over, update your webpage with a new photo and results. Send a thank you email to all of your supporters, which will include a link to your updated page. Thank those who gave and tell those who didn't give that it is not too late.

Subject Lines

- Keep it Simple! Use 5 words or less. The subject line should not exceed 35 characters.

If you have any questions, please open a Salesforce Case.
Avoid words that prompt recipients to hit the delete key as soon as they read the subject line. Words like "free" and "save," using the Personalization option or ALL CAPITAL LETTERS makes your message looks like “spam.”

Be concise and have a clear call to action (i.e., Register your team, Join as a survivor, Spread the word, Volunteer, Donate, Sponsor, etc.). Tell them exactly what you want them to do. If you are asking them to register, say that in the Subject Line. If you need them to donate, put that in the subject line. Industry studies indicate that putting a directive in the subject line will raise the return you were looking for.

**Body Content**
- Keep it short and sweet. Remember people don’t read long and detailed emails. Put those details on your More Details page, and link to it in your email.
- Limit body copy to 250 words, maximum.
- Use the recipient’s first name. Personalization increases response rates.
- Do not use ALL CAPS. It is considered rude and is the equivalent of “shouting” on the Internet.
- Grab the readers’ attention so they will want to click the link to your Web page.
- Ask one thing at a time and then let them know what they can do next – this should be part of each email. For example, there is not always an ask for money but if your event is following the timeline then you may want to add things such as letting them know you are looking for day of event volunteers.
- The tone of the email should be emotional and factual. Tell a clear ACS Story in small chunk. Share a little part of the story each time in the emails.
- Make the Call to Action urgent! Make it personal from a Volunteer Committee member (in the signature line).
- Use the email templates that are already in the Coaching Email section of your Event Management Center. These are great messages that have been created for you with all the above tips in mind.

**Create content based on different audiences.**
- Create different email messages for Youth audiences. Work with your youth volunteer to craft the email. They can write a message that will appeal to college or high school students to help get them to respond.
- Develop messages for Survivors. This is your chance to inform survivors of other ACS volunteer activities throughout the year. Inform your survivors of survivorship activities before and during the event.

**Highlight where the money goes!**
- Use coaching emails to communicate the research and patient programs and services offered by the American Cancer Society.
- The Publicity Chair and/or Online Promotional Chair can use data and information in combination with local stories that highlights how the dollars raised by the event are making a difference in their community

**Proofreading**
- Check spelling and grammar. You want your message to appear thoughtful and reasoned.
- Always, always, always preview your message.
- Send a review email to your event chair, staff partner, English teacher, copy writer, newspaper editor, friend, or loved one. Another pair of eyes is critical.
- Remember, you can’t take back an email once it’s sent. Be sure the links work and there are no errors in dates or typos.

**Scheduling**
- Use the Email Timeline to schedule your messages, make sure there are no pre-scheduled centralized emails or National communications set to go at the same time.
- Send emails between Tuesday and Thursday to get the best results.
- Send follow-up emails. Don’t assume a person doesn’t want to give because they don’t act after your first email. Everyone needs reminding!

Tips for Reducing Email Spam Risk
While there is no 100% guarantee that e-mail messages sent through the EMC will not be identified as spam, there are some simple rules to follow to reduce the likelihood.

• Avoid punctuation in the subject line. Question marks, exclamation points, quotation marks, and even apostrophes can be red flags to spam filters. And, by all means avoid multiple punctuation marks!!!!!!
• Avoid a subject line that would cause someone to not open the e-mail, but instead report as spam. (“You have won a prize!”, “You could be a winner!”, “Good Luck”, “It’s a Party!” etc.)
• Avoid mentioning body parts in the subject line. (Examples: Breast, Prostate, Skin, etc.)
• Do not include images in the e-mail (other than those that are part of the stationery).
• Do not use excessive HTML formatting in the body of your email (Example: Multiple text colors, fonts and sizes)
• Link to newsletters, image files, etc. that are posted on your website, rather than embedding these files in an e-mail.
• Avoid email appending. (Example: If a staff partner pulled a list from Siebel or EMT of constituents who do not have e-mail addresses on file, and then purchased a list of e-mail addresses from an outside source, then compared the two lists and filled in the blanks, then that would constitute e-mail appending) This is widely regarded as spamming by the email industry.
• Send emails to those constituents have not “opted-out” and respect the request of those who have. Recipient complaints are the single greatest cause of delivery barriers.
• Provide an “opt-out” or “unsubscribe” option on each e-mail. This allows the recipient to control their preferences and to be less likely to file a formal complaint.
• Keep your e-mail lists clean by removing bad email addresses.
